Compatible with the Precifluid® volumetric dispenser and time-pressure dispensers, Opti® syringes are designed for high performance.

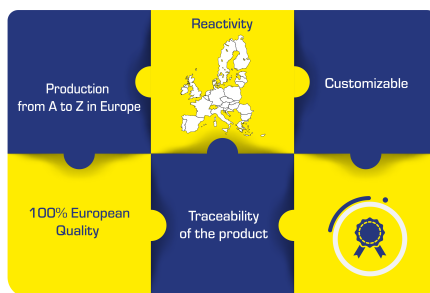

The specificity of these syringes lies in their rounded tip, which allows the syringe to be emptied by more than 99%. It also allows a better fit between the PistonDrop® and the Opti® syringe to ensure precise and repeatable fluid deposits.

Currently available in 3 and 5cc, they will soon be available in 10cc, 30cc, 55cc.
