

## PRECI-CURE

*An UV oven system efficient and reliable for a fast, strong and effective curing.*

### PRECI-CURE

The perfect solution for small productions and R&D.

### Why is it the perfect solution for small production & R&D ?

The Preci-Cure is composed of a **LED UV curing area**, a **controller** and a **UV oven box**. The Preci-Cure is a compact and powerful unit, **capable of curing efficiently a wide range of fluids requiring UV polymerization**.

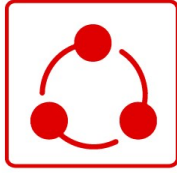

Thanks to its unique **LED technology**, the Preci-Cure does not need to be preheated and the exposure power is immediately available. The LED UV lamp starts working automatically when the door is closed and stops when the door is opened. **Its small size makes it easily transportable and useful for testing several prototypes.**

### ADVANTAGES

- + Compact
- + Secure
- + Quick return on investment
- + Intuitive and easy
- + Efficient
- + Different wavelengths
- + Different sizes
